**Notes:**

1: These were fitted to the rear of later cars, but many customers prefer to fit them at all attaching points. Use as you see fit.

2: There are two tail lamp configurations but only one gasket type is available. You may have to trim the middle to clear the bulb sockets.

3: Does not have pre-drilled holes. Holes for attaching rivets must be cut by customer.

Also note that you might not receive one continuous piece of rubber in some cases where the items is sold per foot. You might receive two pieces at least five feet long when the car requires a total of ten feet.

**Part Number: LI-0089**
