

Part # LI-0082

Instruction Sheet for part BD26888 Front Windscreen Seal

At first (or even a second) glance this seal might appear too large in circumference to possibly fit. Even our own restoration shop has been skeptical over the years.

However, if the factory procedure of fitting the seal to the car (rather than to the windshield) first and then working the “excess” rubber far into the corners of the body is followed, this seal will fit just right. The key is to work the rubber into the corners so there is no gap between the seal and finished body.
