Notes:

- 1: We liberally coat this and the chrome with WD40, install chrome and clamp. Trim flush the next day. The WD40 acts as a solvent to soften the rubber and ensure a tight seal. The rubber is supposed to stay soft.
- 2: Three pieces supplied: two for the A-posts and a third to cut in half for the door shut face seals.
- 3: Does not have pre-drilled holes; installer must drill holes for attachment rivets.
